Re: Chemical Control Corporation Superfund Site  
Elizabeth, New Jersey  
Notice with Respect to Action under Section 106 of CERCLA  
Request for Information Pursuant to Section 104(e) of  
CERCLA and Section 3007 of RCRA

Dear Sir or Madam:

The United States Environmental Protection Agency (EPA) is charged with responding to the release or threatened release of hazardous substances into the environment and with enforcement responsibilities under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. §9601 et seq., as amended. EPA also regulates the handling of hazardous waste under the Solid Waste Disposal Act, 42 U.S.C. §6901 et seq., as amended by the Resource Conservation and Recovery Act (RCRA) and other laws.

EPA has recently completed an investigation of the release or threatened release of hazardous substances, pollutants, and contaminants at the above-referenced site. EPA intends to spend public funds on any corrective measures necessary to control such release or threatened release. Unless EPA determines that a responsible party or parties will properly perform such actions, EPA intends to do so pursuant to applicable provisions of CERCLA.

Under Section 107(a) of CERCLA and other laws, responsible parties may be liable for any costs incurred by the government in taking corrective actions at the site. Such costs may include, but need not be limited to, expenditures for investigation, planning, cleanup of the site, and enforcement.

411222

By this letter, EPA notifies you of your potential liability with regard to this matter and encourages you, as a potentially responsible party (PRP), to undertake voluntary cleanup activities.

Responsible parties under CERCLA include current and past owners or operators of a facility and persons who generated the hazardous substances or were involved in the transport, treatment, or disposal of them. Based on its investigations, EPA believes that your company is a PRP. Before the government undertakes necessary actions at the site, we seek to know if your corporation will voluntarily perform the work required to abate any releases or threatened releases of hazardous substances, pollutants, or contaminants at and from the site.

For your information, to date EPA has conducted the following studies at the site:

1. A remedial investigation (RI) to identify the nature and extent of the release and threatened release.
2. Feasibility studies (FS) to evaluate possible remedial actions to remove, treat, or contain hazardous substances that remain in subsurface soils at the site.

In addition, certain other remedial actions have already been implemented, and the site is currently a fenced, gravel-covered vacant lot.

The results of the above studies indicate that further corrective measures may be necessary to protect public health, welfare, or the environment. These corrective measures may include, but need not be limited to the following:

1. Design and implementation of the EPA-approved remedial option for addressing the above mentioned soil contamination; and
2. Any monitoring and maintenance necessary after remedial measures have been completed.

Please be advised that EPA has considered plans for certain remedial actions at the site, based on the results of the RI and FS reports. By the Record of Decision process, EPA has

selected one of the eight remedial alternatives, developed in the FS, that were considered for the site in order to address the contaminated soils still present at the site.

EPA is prepared to enter into contracts for the Remedial Design for the selected remedial alternative and for remedial activities addressing certain gas cylinders with unknown contents on or about April 1, 1988. Many times PRPs find it is in their best interest to perform such activities rather than the federal government. EPA has had a number of discussions with a group of 30 PRPs on the subject of possible private party performance or funding of the remaining work.

This notice is being given with respect to action under Section 106 of CERCLA, as amended. With this notice, EPA seeks to facilitate an exchange of information and initiate negotiations with PRPs for future response action at the site, without disrupting ongoing activities. Procedures would be available for EPA to issue a "special notice" pursuant to Section 122(e) of CERCLA, should informal negotiations produce a reasonable expectation that the PRPs will be able to reach an agreement with EPA, to undertake or finance the selected remedial action. With special notice, Section 122(e) of CERCLA imposes a moratorium during which EPA may not initiate the implementation of the remedy. EPA may, however, proceed with the remedial design as settlement negotiations develop. If EPA determines that a good faith effort will be made by PRPs to negotiate a settlement, EPA would be prepared to enter into formal negotiations, and impose a moratorium in accordance with the special notice procedures of Section 122(e) of CERCLA.

EPA believes that good faith proposals are those in which the PRP or PRPs make a satisfactory demonstration of qualification and capability to conduct or finance the selected EPA-approved design and remedy, including reimbursement of costs associated with qualified third party oversight of the design and remedy. Any agreement between a PRP and EPA regarding private party conduct of the remedial activities must be formalized in a consent decree issued under Section 106 of CERCLA.

If future response actions are taken by EPA rather than by the responsible parties, PRPs may be subject to a legal action pursuant to Section 107 of CERCLA, 42 U.S.C. § 9607, to recover funds spent by EPA in response to the release of hazardous substances at this site.

The parties identified to date by EPA as potentially responsible parties for the contamination at the Chemical Control site are named in a separate attachment, Attachment 1 to this letter. Each of the companies listed in Attachment 1 will receive a copy of this letter, or has received a copy of a similar letter sent to approximately 30 companies in August, 1987. EPA is continuing its investigation to identify other potentially responsible parties. You will be notified when and if any other potentially responsible parties have been identified.

A number of the parties identified as responsible parties by EPA in August, 1987, have begun preliminary, informal discussions regarding a possible settlement. A PRP Ad Hoc Steering Committee has been established.

If your company is interested in pursuing a settlement with EPA regarding the selected remedial action, you should notify EPA of your intention to enter into formal negotiations. Notification should be in writing and should be delivered to EPA no later than 14 days after the date this letter is received by your company.

EPA anticipates a request by the recipients of this letter for additional information concerning the proposed activities at Chemical Control. Accordingly, a conference among all recipients has been tentatively planned for the week of March 6, 1988. You will be notified in a follow-up letter indicating the exact date, time and place of this conference.

Attendance at this conference will provide you with the opportunity to discuss with EPA your responsibility for addressing any problems at this site. Representatives of the PRP Ad Hoc Steering Committee will be present to discuss their preliminary efforts to consider a settlement.

In order to determine the need for a response to a release or threatened release of a hazardous substance, pollutant, or contaminant, choose or take a response action, or otherwise enforce the provisions of CERCLA, EPA may, pursuant to Sections 104(e)(1) and 104(e)(2) of CERCLA, require parties to provide information relating to the materials generated, treated, stored, or disposed at, or transported to a facility, the nature or extent of a release or threatened release of a hazardous substance, and the ability of a party to pay for or perform a cleanup. In addition, pursuant to Section 3007(a) of RCRA, EPA may require parties that have handled hazardous wastes to provide information relating to such wastes.

Failure to provide the requested information may subject your company to enforcement action under either statute. Enforcement action may include the assessment of penalties of up to \$25,000.00 per day for each day of continued noncompliance.

Pursuant to the aforementioned statutory provisions, EPA hereby requires that you answer the questions posed in the attached Request for Information. Your response to this request for information should be post-marked or received at EPA within twenty-one (21) calendar days of your receipt of this letter, and should be mailed to:

U.S. Environmental Protection Agency  
Region II  
Emergency and Remedial Response Division  
26 Federal Plaza, Room 737  
New York, New York 10278  
Att'n: Nigel Robinson  
Project Manager

A copy should be sent to:

Office of Regulatory Services  
New Jersey Department of Environmental Protection  
CN-402  
Trenton, New Jersey 08625  
Attention: John MacDonald, Esquire

Any letter of response should clearly identify--by name, address, and telephone number--the person with whom EPA should communicate about this matter.

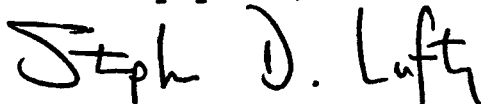

Be advised that you are under a continuing obligation to supplement your response if information not known or not available to you as of the date of submission of your response should later become known or available to you. Moreover, should you find, at any time after the submission of your response, that any portion of the submitted information is found to be untrue, you may be subject to criminal prosecution.

This request for information is not subject to the approval requirements of the Paperwork Reduction Act of 1980, 44 U.S.C. § 3501 et seq. You may, however, assert a business confidentiality claim covering all or part of the information requested. The claim may be asserted by placing on or attaching to the information a cover sheet, stamped or typed legend, or

other suitable form of notice employing language such as "trade secret" or "company confidential" or "proprietary." Information covered by such a claim will be disclosed by EPA only in accordance with and by means of procedures set forth in 40 CFR Part 2, Subpart B. If no such claim accompanies the information when it is received by EPA, it may be made available to the public by EPA without further notice to you.

If you wish to discuss this matter before the conference, please contact Nigel Robinson of my staff at (212) 264-8674 or Margaret Thompson of the Office of Regional Counsel at (212) 264-4434.

Sincerely yours,

A handwritten signature in dark ink, reading "Steph D. Luftig". The signature is written in a cursive, slightly slanted style.

Stephen D. Luftig, Director  
Emergency and Remedial Response Division

cc: Anthony Farro, Director  
Division of Hazardous Site Mitigation, NJDEP

Gerard. Burke, Deputy Director  
Office of Regulatory Services, NJDEP

**EPA REQUEST FOR INFORMATION**

**SHIPMENT OF WASTE MATERIAL TO THE CHEMICAL CONTROL SITE**

**Date: February 1988**

**EPA REQUEST FOR INFORMATION  
SHIPMENT OF WASTE MATERIALS TO THE CHEMICAL CONTROL SITE**

**Instructions**

In responding to this Request for Information, the following instructions apply:

1. Respond to each Question in the space provided. If extra space is needed in answering any question, an extra sheet of paper should be used, and the question you are responding to, indicated by number. Consult with all present and former employees and agents of your company whom you have reason to believe would be familiar with each question in preparing your response to each.
2. Complete the questions by providing the following:
  - a. Identifying on Figure 1 and or Figure 2, every facility from which you believe waste material was shipped to the Chemical Control site.
  - b. Identifying all past and present employees of your company who are aware of any shipments of waste material to the Chemical Control site from your company or who are aware of waste shipments given to Chemical Control employees or agents.
  - c. Provide all other documents and information requested.
3. Sign and notarize the Certification Statement where indicated.
4. Send the original completed signed copy of this questionnaire and all other documents requested therein to:

Mr. Nigel Robinson, Project Manager  
U.S. Environmental Protection Agency  
26 Federal Plaza, Room 737  
New York, New York 10278

A copy of this package should also be sent to:

Mr. John MacDonald, Esq.  
Office of Regulatory Services  
New Jersey Department of Environmental Protection  
CN-402  
Trenton, New Jersey 08625

This final package must consist of the following.

- a. The Certification Statement signed by an appropriate corporate official and notarized;
  - b. Completed copies of Figures 1 and or Figure 2 and Figure 3 (write the word "None" on any of these Figures if applicable);
5. The terms "you," "your company" and similar terms shall mean all past and present facilities, subsidiaries, and employees of your corporation unless its meaning is otherwise explicitly redefined in any specific question.
  6. The terms "any waste material" or "any industrial waste material" mean any solid, liquid or sludge materials or any mixtures thereof which possess any of the following characteristics:
    - a. it contains one or more "hazardous substances" (at any concentration) as defined in 42 U.S.C. §9601(14);
    - b. it is a "hazardous waste" as defined in 42 U.S.C. §6904;
    - c. it has a pH less than 2.0 or greater than 12.5;
    - d. it reacts violently when mixed with water;
    - e. it generates toxic gases when mixed with water;
    - f. it ignites or explodes;
    - g. it is an industrial intermediate waste product;
    - h. it is an industrial treatment plant sludge or supernatant;
    - i. it is an industrial byproduct having some market value;
    - j. it is coolant water or blowdown waste from a coolant system;
    - k. it is a spent product which could be reused after rehabilitation (e.g., recycled oil);
    - l. it is any material which you have reason to believe would be toxic if either ingested, inhaled or placed in contact with your skin;
    - m. it is municipal treatment plant sludge;

- n. it is contaminated oil or some other petroleum based liquid; or
- o. it is asbestos or some asbestos product or mixture.

The term "waste materials" does not include domestic or office refuse or garbage, tree stumps, vegetation, and construction debris. Therefore, information concerning these specific waste products can be omitted from this questionnaire.

- 7. For each document produced in response to this Request for Information, indicate on the document, or in some other reasonable manner, the number of the Question to which it responds.
- 8. Where documents are requested but are not available, state the reason(s) for their unavailability. However, to the best of your ability, identify any such document by stating its author, date, and subject matter.
- 9. Where you have reason to believe that any present or past employee or agent of your company may be able to answer any of the questions contained herein or may be familiar with operations or disposal of waste materials at the Chemical Control site, identify such persons by name, address, and phone number on Figure 3 including a brief statement indicating the basis for such belief.
- 10. If you cannot provide a precise answer to a question, please approximate, but, in any such instance, note the reason why you cannot be more specific.
- 11. The terms "hazardous waste" and "hazardous substance", as used in the questionnaire, are as defined in 42 U.S.C. §6904 and 42 U.S.C. §9601(14), respectively.
- 12. The term "Chemical Control site" and similar terms mean the facility located on South Front Street in Elizabeth, New Jersey which is bordered by the Elizabeth River on the west and the Arthur Kill waterway which is located approximately 200 feet east of the facility.

GENERAL INFORMATION

If your company was a generator of waste materials that were sent to the Chemical Control Corporation facility, please answer question I. If your company was responsible for transporting waste materials to the Chemical Control Corporation facility, please answer question II.

Question I

Generator

- (1) Did your company ever send hazardous wastes, hazardous substances or wastes of any other type ( as defined on page 3, item #6 and page 4, item #11) to the Chemical Control Corporation facility in Elizabeth, New Jersey.

Yes \_\_\_\_\_ No \_\_\_\_\_

- (2) If you answered yes to (1), state the years in which your company sent waste materials to the Chemical Control Corporation?

19 \_\_\_\_\_ to 19 \_\_\_\_\_

- (3) Give the name(s) and address(es) of your company's facility or facilities from which the waste materials originated. (See Figure 1.)

- (4) Name the type and quantities (in gals., tons, drums, etc.) of waste that was transported from each of your company's facility to the Chemical Control Corporation Site. (See Figure 1.)

- (5) Estimate the total amount of waste materials which was transported to the Chemical Control Corporation site during the years your company did business with the Chemical Control Corporation, by filling in the information below. (If the answer for any of these items is zero, write "none" on the line provided.)

Liquid Waste: \_\_\_\_\_ gallons

Solid Waste: \_\_\_\_\_ tons

Sludge: \_\_\_\_\_ gallons

Total No. of drums \_\_\_\_\_

- (6) List the name(s) of all the haulers that took waste from your company's facility or facilities, to the Chemical Control Corporation Site.

QUESTION II

Transporter

- (1) Did your company ever transport any waste materials to the Chemical Control Corporation facility?

Yes \_\_\_\_\_ No \_\_\_\_\_

- (2) If you answered yes to (1), state the year(s) in which you transported waste materials to the Chemical Control Corporation facility.

19\_\_\_\_ to 19\_\_\_\_

- (3) Name the company or companies that your company transported waste materials for, to the Chemical Control Corporation facility. (See Figure 2.)

- (4) Name the types and quantities (in gals., tons, drums, etc.) of waste (as defined on page 3, item #6) that was transported from each of these company's facilities. (See Figure 2) Specify the company, facility location and the years these shipments were made. (See Figure 2.)

- (5) Estimate the total amount of waste materials which your company transported for each individual company by filling out the information below. (If the answer for any of these items is zero, write "none" on the line provided.)

Company:

Liquid waste: \_\_\_\_\_ gallons

Solid waste: \_\_\_\_\_ tons

Sludge: \_\_\_\_\_ gallons

Total No. of drums: \_\_\_\_\_

Total No. of Truck/Shipments: \_\_\_\_\_

DOCUMENT REQUEST

Provide copies of all documents, records, reports, and analyses in your company's possession or control which relate to each of the following:

- a. all shipments of waste materials to the Chemical Control site;
- b. all removals of waste materials from your company by the Chemical Control Corporation;
- c. all business transactions between your company and the Chemical Control Corporation (or its agents and employees) including the following:
  - New Jersey State waste manifests concerning all waste material given to Chemical Control
  - bills of lading issued by or to Chemical Control Corporation
  - purchase orders sent to Chemical Control Corporation
  - receipts received from Chemical Control drivers or agents
  - bills received from the Chemical Control Corporation
  - checks or other negotiable instruments issued by your company payable to the Chemical Control Corporation
  - all contracts executed between your company and the Chemical Control Corporation
  - all correspondence sent to the Chemical Control Corporation by your company
  - all correspondence received from the Chemical Control Corporation.

**EPA Request for Information**  
**Shipment of Waste Materials to the Chemical Control Site**

**CERTIFICATION OF ANSWERS TO THE REQUEST FOR INFORMATION**

I hereby affirm and certify under penalty of perjury that the following facts are true to the best of my knowledge and belief:

- a. That I have personally examined and am familiar with all the information provided herein in response to the EPA Request for Information.
- b. That all the answers contained are true, complete, and accurate to the best of my information and belief;
- c. That all documents contained herein are complete and authentic unless otherwise indicated; and
- d. That in the preparation of the responses contained herein I have contacted and discussed the issues contained in the EPA Request for Information with all present and former employees and agents of the company whom I have reason to believe may have been familiar with any information concerning the shipment of any materials to the Chemical Control Corporation facility and with any of the issues and questions contained in this Request.

I am aware that substantial fines and penalties, including imprisonment, exist for submitting false, misleading, or inaccurate information in response to this Request for Information.
